

ANB1501C1

Rugged MIL Operational Transit Case

Designed and Made in the USA

Acumentrics continues to push the SWaP envelop through the reduction in Size & Weight and increase Power of this (2U) two-man lift 2500W Operational Transit Case developed for the Common Hardware Systems (CHS) community of users, to modernize their **Expeditionary** applications that need lighter weight, greater interoperability, and connectivity on the battlefield. Acumentrics continues to deliver **Trusted Power Solutions**, when clean power is mission critical under extreme harsh conditions.

■ **ANB1501C1 Rugged MIL Operational Transit Case**

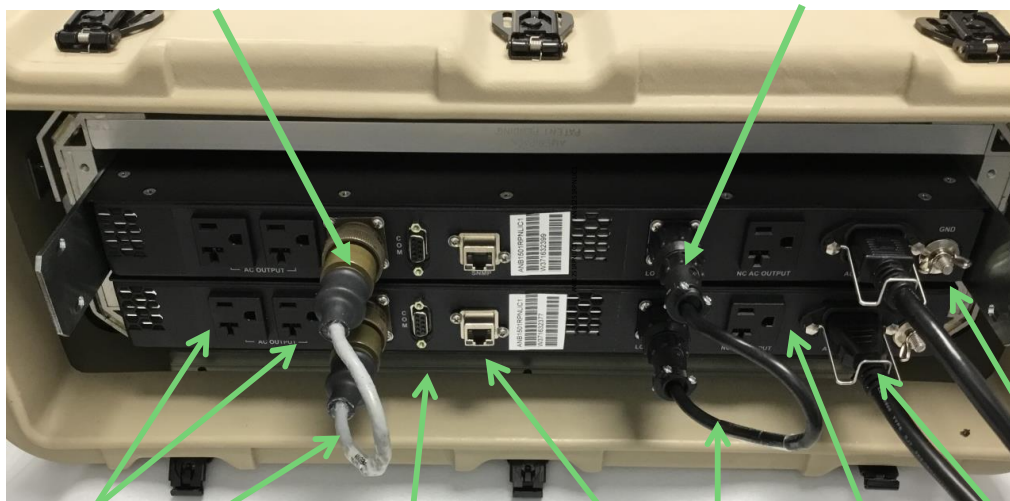

Integrated 2U 3000VA Operational Transit Case UPS System with AC In, AC Out @ up to 2500W total, SNMPv3 and LFP Batteries.

Key Specifications:

- 2U, 19" Rack Case (desert sand) with fixed-mounted, shock Isolated 20" Rack
- External Size 11" x 24" x 38", 105 lbs. fully operational
- 3000VA, 2500W
- (2) Mounting Rail Kits
- N+1 Fault Tolerant Power System and Load Share Cable
- (2) Rugged UPS ANB1501RPNLIC1 in an N+1 load sharing configuration
- (2) AC Input Cables

N+1 Fault Tolerant Cable
Synchronizes the AC output
from both UPS's

NO PDU REQUIRED,
load shares the AC Output power
from both UPS's

Critical AC Outputs N+1 Fault Tolerant RS232 Communication SNMP Comm Load Share Non Critical AC Output AC Input Ground Pin
